

Structures of Directory in Operating System and Use of Command Line

I. Structures of Directory

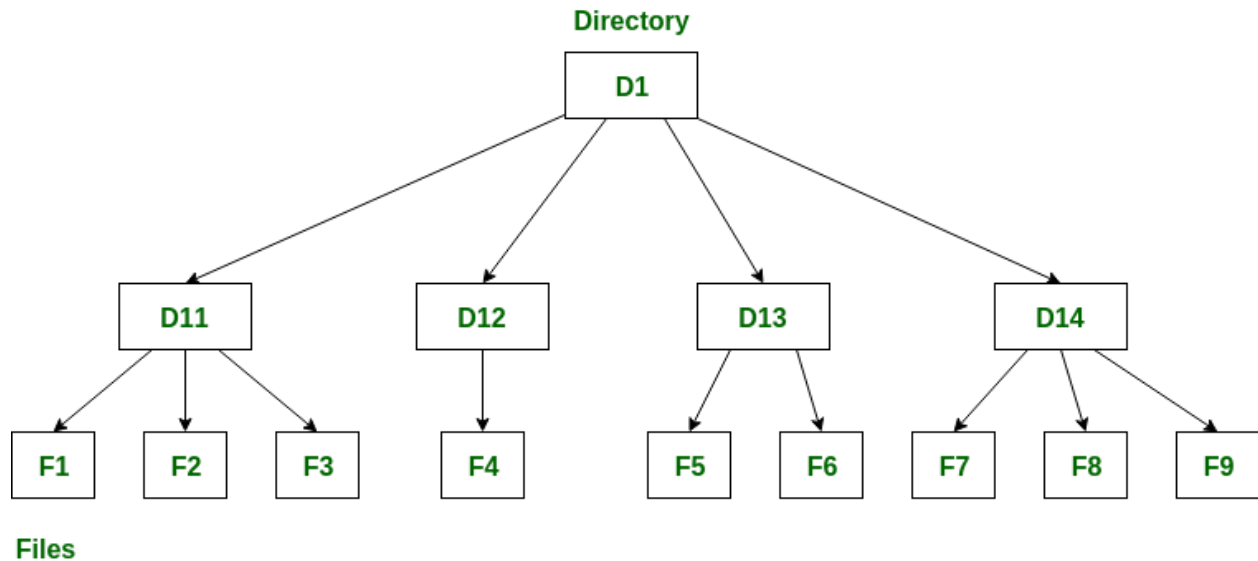

Image credit: geeksforgeeks.org

II. Command Line (Command Prompt in Windows, Terminal in MacOS)

Bash Command	What it does
pwd	Print working directory
ls	List directory contents
ls -a	List folders and files that begin with "." (hidden/system files)
cd	Change directory
mkdir	Create a new directory
cp	Copy files and directories
mv	Move or rename directory
clear	Clear the terminal window
